
FACULTY OF ENGINEERING AND THE BUILT ENVIRONMENT (CEREMONY 2)

ORDER OF PROCEEDINGS

Academic Procession.

(The congregation is requested to stand as the procession enters the hall)

The Presiding Officer will constitute the congregation.

The National Anthem.

The University Dedication will be read by a member of the SRC.

Musical Item.

Welcome by the Master of Ceremonies.

The Master of Ceremonies will introduce the guest speaker.

Address by guest speaker.

The graduands and diplomates will be presented to the Presiding Officer by the Dean of the faculty.

The Presiding Officer will congratulate the new graduates and diplomates.

The Master of Ceremonies will make closing announcements and invite the congregation to stand.

The Presiding Officer will dissolve the congregation.

The procession, including the new graduates and diplomates, will leave the hall.

(The congregation is requested to remain standing until the procession has left the hall.)

NATIONAL ANTHEM

Nkosi sikelel' iAfrika
Maluphakanyisw' uphondolwayo,
Yizwa imithandazo yethu,
Nkosi sikelela, thina lusapho lwayo.

Morena boloka etjhaba sa heso,
O fedise dintwa la matshwenyeho,
O se boloke,
O se boloke setjhaba sa heso,
Setjhaba sa South Afrika – South Afrika.

Uit die blou van onse hemel,
Uit die diepte van ons see,
Oor ons ewige gebergtes,
Waar die kranse antwoord gee,

Sounds the call to come together,
And united we shall stand,
Let us live and strive for freedom,
In South Africa our land.

DISTINCTIONS IN THE FACULTY OF ENGINEERING AND THE BUILT ENVIRONMENT

A qualification may be awarded with distinction, honours, and first class honours where a student has shown outstanding academic achievement.

The Bachelor of Architectural Studies (BAS) may be awarded with distinction where a candidate has obtained

a minimum of 75% in the Design and Theory Studio III examination and minimum of 60% in one of the other Design and Theory Studio examinations

and an additional three marks of at least 75% in his or her BAS course work.

The degrees of Bachelor of Science in Engineering and Bachelor of Science in Geomatics may be conferred with

first class honours, where the candidate has obtained at least 75% for the research project and a weighted average of 75% for the degree or,

honours, where the candidate has obtained a minimum of a second class pass in the research project and a weighted average of 65% for the degree.

The degrees of Bachelor of Science in Construction Studies and Bachelor of Science in Property Studies may be awarded with distinction where a candidate obtains a minimum weighted average of 75% for the degree.

**NAMES OF
GRADUANDS/DIPLOMATES**

Graduation ceremony suspended because of Covid-19. All graduated *in absentia* at a special Congregation of the University of Cape Town on 17 March 2020.

**1. FACULTY OF ENGINEERING
AND THE BUILT ENVIRONMENT**

DEGREE OF MASTER
 OF ENGINEERING

In Nuclear Power:
 Fadeelah Kenny

DEGREE OF MASTER
 OF PHILOSOPHY

In Nuclear Power:
 Best Khoza

In Sustainable Mineral Resource Development:
 David Gabriel Viljoen (with distinction)

DEGREE OF MASTER OF SCIENCE
 IN ENGINEERING

In Electrical Engineering:
 George Hilton Gabriels
 Abdurahman Daleel Lilla
 Ivani Molver

In Mechanical Engineering:
 Nicolaas Johannes Hallatt

DEGREE OF DOCTOR
 OF PHILOSOPHY

In Chemical Engineering:
 Cledwyn Tawanda Mangunda
 Thesis Title: *An investigation into Fe(III) oxy-hydroxides precipitation in lime neutralization processes*

Cledwyn Mangunda completed his BEng (Hons) and MEng qualifications at the National University of Science and Technology (NUST) in Bulawayo, Zimbabwe. He worked in the food and timber processing industries and then pursued a career in academia before joining UCT for his PhD studies in 2015.

Cledwyn Mangunda's thesis focuses on understanding the influence of operating conditions on the product characteristics and solid-liquid separation of iron solids formed during the lime treatment of acid mine drainage (AMD). His investigation covers low feed iron concentrations systems, similar to those which pose AMD treatment challenges, and how changes in these iron concentrations influence dewatering behaviour. He proceeds to look at how moderate variations in temperature, amount of neutralising agent, and extended periods of elevated temperature treatment influence the settling and filtering of the iron solids. He further unpacks the complex nano and micro-structure of iron solids, thereby establishing a systematic relationship which links operating conditions to product characteristics and consequent improvements in solid-liquid separation. The findings will inform AMD treatment processes with potential improvements to operating conditions that will lead to reduced deposition of iron solids to landfills and enhance water recovery.

Supervisor: Professor AE Lewis (Chemical Engineering)
Co-supervisor: Professor J Petersen (Chemical Engineering)

In Electrical Engineering:

Stanislaus Ogechukwu Nnadih

Thesis Title: *Multi-wavelength observations of sprites over southern Africa*

Stanislaus Nnadih is a physicist from Enugu State University of Science and Technology, Nigeria. He joined SpaceLab in the Electrical Engineering Department at UCT in 2015 for his PhD studies. He is an alumnus of the International Space University and a staff member of the Nigeria Space Agency.

Stanislaus Nnadih's thesis focuses on observing upper atmospheric lightning phenomena known as sprites, which are often described as electrical discharges in the mesosphere following an active thunderstorm. Although the sprite phenomenon was anecdotally reported over Johannesburg in 1937, for many years there were no active sprite-related research programmes in Africa, despite it being a lightning-rich continent. In 2016, Stanislaus Nnadih began an observation campaign at the South African Astronomical Observatory in Sutherland and recorded the first images of sprites in southern Africa. He also made several other observations of these elusive events in 2017 and 2018. His study shows that the average occurrence rate for sprites in southern Africa is 0.14 sprites/minute and suggests that the average characteristic electron energies and the strength of the electric fields in sprites were 5.5 eV and 150 V/m, respectively.

Supervisor: Professor P Martinez
(Electrical Engineering)

Co-supervisor: Professor M Kosch
(South African Space Agency,
Hermanus)

In Sustainable Energy Engineering:

Deepti Charitar

Thesis Title: *Exploring the potential of nanofluids to enhance the productivity of solar stills*

Deepti Charitar holds a BSc(Eng) in Chemical Engineering and MSc(Eng) in Sustainable Energy Engineering from UCT. After completing her

bachelor's degree, she worked as a Technical Officer in Mauritius for some months before returning to UCT for her postgraduate studies.

Deepti Charitar's thesis focuses on the use of nanofluids in solar stills. A solar still is a device which uses solar energy to produce potable water from saline water. Nanofluids provide an attractive means of increasing the productivity of a solar still. The study examines, both theoretically and experimentally, the effect of nanoparticle size on the productivity of solar stills. This was achieved by developing a novel mathematical model incorporating the view factor for solar stills with nanofluids. Identical solar stills were designed, built and tested under the same climatic conditions. It was found that the productivity of a solar still decreases with increasing nanoparticle size. Nonetheless, the mathematical model for the nanofluids was only marginally sensitive to nanoparticle size although the effect of nanoparticle size on distillate yield was experimentally significant. A key implication of the findings is the need to develop accurate thermophysical correlations for nanofluids.

Supervisor: Dr A Madhlopa
(Mechanical Engineering)

In Mechanical Engineering:

Patrick Udeme-Obong Akpan

Thesis Title: *Impact on heat rate and subsequent emissions due to varying operation of coal fired power plants*

Patrick Akpan holds a BEng in Mechanical Engineering from the University of Nigeria (UNN) and an MSc in Process Systems Engineering from Cranfield University. He has seven years teaching and research experience at UNN and joined the department of Mechanical Engineering at UCT in 2016 for his PhD studies.

Patrick Akpan's thesis focuses on the development of a novel and simple Variable Turbine Cycle Heat Rate (V-TCHR) model for predicting the partial load thermal performance of different Coal Fired Power Plant (CFPP) architectures. This model will

enable more accurate CO₂ emissions impact studies for electrical networks with a substantial renewable generation. The research begins with development and validation methodologies for setting up representative CFPP process models using the Virtual Plant software. The thermal performance of 192 process models was investigated at various partial load conditions. The observations drawn from the data led to the development of the V-TCHR model. He applied the V-TCHR model in a CO₂ emissions impact study of four different hypothetical power system networks. His results show the applicability of the V-TCHR model in energy mix modelling, and how one would under-estimate the emissions by 2-9% if variable heat rate is not incorporated into the study.

Supervisor: A/Professor W Fuls
(Mechanical Engineering)

ORIGIN OF THE BACHELOR DEGREE

The term 'Bachelor' derives from ancient ceremonies (the first such was believed to have been at Oxford in 1432) held to honour achievements of scholarship. The word derives from bacca lauri (laurel berry). Instead of the hoods we use today to signify your graduation, graduands of old wore garlands of laurel leaves and berries.

So the term has nothing to do with our modern understandings of what being a bachelor means, and everything to do with a long tradition of celebrating high achievement.

VISION AND MISSION

UNIVERSITY OF CAPE TOWN

Vision

An inclusive and engaged research-intensive African university that inspires creativity through outstanding achievements in learning, discovery and citizenship; enhancing the lives of its students and staff, advancing a more equitable and sustainable social order and influencing the global higher education landscape.

Mission

UCT is committed to engaging with the key issues of our natural and social worlds through outstanding teaching, research and scholarship. We seek to advance the status and distinctiveness of scholarship in Africa through building strategic partnerships across the continent, the global south and the rest of the world.

UCT provides a vibrant and supportive intellectual environment that attracts and connects people from all over the world.

We aim to produce graduates and future leaders who are influential locally and globally. Our qualifications are locally applicable and internationally acclaimed, underpinned by values of engaged citizenship and social justice. Our scholarship and research have a positive impact on our society and our environment.

We will actively advance the pace of transformation within our University and beyond, nurturing an inclusive institutional culture which embraces diversity.

THE UNIVERSITY OF CAPE TOWN DONOR ROLL

The University of Cape Town gratefully acknowledges the sustained contributions of the following partners. Their generosity has assisted us toward our goals of improving student access to tertiary education and promoting curriculum, staff and student transformation; increasing our research capacity; and implementing programmes that promote social engagement and community upliftment.

Note:

As of January 2015, the levels of individual donors' giving circles have changed as follows:

- Chancellor's circle: formerly R250 000+, now R500 000+;
- Vice-Chancellor's Circle: formerly R100 000 – R250 000, now R250 000 – R500 000;
- Dean's circle: formerly R60 000 – R100 000, now R100 000 – R250 000;
- Friends of UCT: formerly <R60,000, now <R100,000.

Please note that these changes only affect donations received after 1 January 2015. All donors who were members of particular circles prior to January 2015, will continue to be recognised in their original circles, until the rolling five-year giving period has elapsed.

*We apologize for any omissions or errors. If you would like to query your donations totals, circle membership,
or any other matter related to your gifts to UCT, please email giving@uct.ac.za.*

A full list of UCT donors is also available at www.uct.ac.za/main/donating-to-uct/donor-recognition.

Welcome, Wamkelekile, Welkom – today is not the end of your relationship with the university but the beginning of a new phase in your continuing relationship with UCT, one that you share with the UCT community of over 100 000 alumni.

Diverse as this community is, the shared experiences of a critical academic ethos and a spectacular campus make for a strong network that has a wide footprint, not only in South Africa, but across the continent and the globe.

We set a great store by our links with our alumni, and indeed the links alumni have with each other. We promise that we will be in touch, and ask you in turn to let us know not only your current contact details but also, from time to time, something of your lives and where you are in your careers.

*Updates can be done on the web – <http://www.uct.ac.za/dad/alumni/update/>
- or by writing to the Alumni Office, UCT, PB X3 Rondebosch 7701
or by contacting us on (27) (21) 650 3746.*

*Your alma mater looks forward to welcoming you back,
whether to a public lecture, a leadership forum, your class reunion,
or just an informal call!*
